(54) DUSTPROOF STRUCTURE OF DISPLAY PART OF
PORTABLE ELECTRONIC EQUIPMENT

(57) Abstract:

PURPOSE: To provide a dustproof display join a portable electronic equipment which can prevent dusts/dirts on the display surface of the display part even if they enter through spacing of an equipment case.

CONSTITUTION: An elastic frame body 61 consisting of, for example, a sponge is applied to an upper surface around a display window 36 of a spring pressure plate for pressing and mounting a liquid crystal display panel 31 to a circuit substrate 41 in a processing part block 4. The upper surface of a transparent plate 37 mounted to an upper equipment case 1 by solvent welding is pressure-welded to the upper surface of the elastic frame body 61. The elastic frame body 61 closes the area between the display window 36 of a panel press plate 34 and the transparent plate 37.
